ZIRKONZAHN-TRIPOD

Professional photos of your cases with the new Zirkonzahn-Tripod!

ZIRKONZAHN-TRIPOD

In teamwork with specialists from Cullman Zirkozahn developed a tripod aimed specifically at the dental market. This exclusive state-of-the-art tripod, with integrated cantilever arm and rotating swivel-head, is covered by anodized aluminium and fiber reinforced composites. The rotation mechanism features predetermined lock settings at every 15 degrees and allows cases to be shot from all-round while maintaining existing model angle. Maximum stability is achieved through quick lock system on the main column, quick-lock clamps and rubber cuffs on the leg extensions.

The tripod is suitable for all conventional cameras!

THE NEW ZIRKONZAHN-TRIPOD
Shots from
360 degrees
POSSIBLE WITH

TECHNICAL DATA:

- take shots in rotation every 15 degrees with predetermined lock settings
- standard connection for all conventional cameras
- collapsed length 56 cm
- extra torsion resistant, lightweight and robust
- tripod height variable from 50 cm – 145 cm
- weight incl. arm and swivel head – 4 kg approx.
- max load 7.5 kg
